

MycoTOOL Mycoplasma Real-Time PCR Kit

Rapid and accurate testing

Mycoplasmas are a common source of contamination in biopharmaceutical production, cell therapy, and tissue engineering, with contamination rates reported between 15 and 35% according to recent industry data.*

The Roche MycoTOOL Real-Time PCR Kit makes mycoplasma testing fast, easy and reliable. Avoid the 28-day culture test and obtain results in just a few hours.

Achieve high sensitivity and specificity through improved tests

- ≤ 10 CFU/ml, meeting regulatory requirements
- No cross reactivity with closely related bacterial species

Rely on an accurate, and robust test procedure

- Measures ~150 culturable and non-culturable mycoplasma species
- Optimized controls and validated reagents (mycoplasma free)

Save time with easy-to-use kit and proven real-time PCR technology

- Automated workflow using automated sample preparation and Real-Time PCR
- <5 hours, including sample preparation**

Characteristics

MycoTOOL Mycoplasma Real-Time PCR Detection Kit

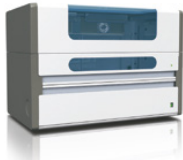

| | |
|------------------------------|---|
| Sample prep | 1 ml cell culture from high throughput or manual sample preparations. |
| Control concept | Recovery of sample preparation is controlled using an internal control. |
| Enhanced specificity | ~150 mycoplasma species can be detected. The probe format ensures that nonspecific amplicons are not detected**. |
| All reagents included | Supplied and ready-to-use reagents jump start your assay. |
| High cell densities | Unprocessed bulk of standard cell concentrations (e.g., 5×10^6 CFU/ml) processed directly. |
| High quality | Roche is certified according to ISO 13485. Change notification available upon request. |

For use in quality control/manufacturing process only.

The MycoTOOL Mycoplasma Real-Time PCR Kit is easily combined with the MagNA Pure 96 Automated Sample Preparation System and the LightCycler® 480 Real-Time PCR Instrument for high throughput automated workflows.
