

Residual Protein Trypsin Kit

Complete manufacturing solutions for improved product safety

Enzymes used in biopharmaceutical manufacturing – during cell preparation or for the modification and activation of products – pose safety risks and must therefore be removed before final product release. Conventional methods used to ascertain the presence of enzymes are based on measuring enzyme activity, which fails to detect inactivated proteins that can still be immunogenic.

To enhance product safety, Roche CustomBiottech has introduced high-performance kits based on ELISA technology to reliably detect complete and fragmented enzymes, independent of activity.

The **Residual Protein Trypsin Kit** includes high-affinity polyclonal antibodies that detect the presence of enzymes with high sensitivity and in a broad range of sample matrices and types. Combining these kits with Roche animal-free, GMPgrade enzymes augments production efficiency, from the use of high-activity enzymes to timely verification of their clearance.

Benefit from:

- **Accurate** detection of enzymes and enzyme fragments in process samples and final biopharmaceutical products to increase product safety.
- **Precise control** due to activity-independent detection.

Residual Protein Trypsin Kit features:

- **High specificity**
Antibodies raised specifically against Roche Recombinant Trypsin.
- **High sensitivity**
Limit of detection 0.5 ng/ml.
- **Reliability**
High lot-to-lot consistency of kit reagents, leading to reproducible results.
- **Convenience**
All-inclusive reagent kits with pre-coated plates, controls, and standards.
- **Fast turnaround time**
Time-to-result: 2 – 2.5 hours.

Test characteristics for Trypsin detection*

Residual DNA <i>E. coli</i> Kit	Specification	Typical performance
Sensitivity	≤0.5 ng/ml	approx. 0.5 ng/ml
Measuring range	0.5 – 50 ng/ml	
Precision	≤15%	<4%
Accuracy (vs. weight)	≤25%	<10%
Specificity	Roche Recombinant Trypsin, expressed in <i>Pichia pastoris</i> *	
Assay time (h:min)	2 – 2:30 total assay time	
Test format	96 reactions can be split into 2 runs	

*Compatibility with enzyme formulations from other suppliers must be verified. (*Data derived from Roche R&D.)

Ordering information

Product	Catalog Number
Residual Protein Trypsin Kit** (96 reactions)	07 568 975 001
