Sucrose Assay for Cedex Bio and Cedex Bio HT Analyzers
High performance and reproducibility with accurate data

The Sucrose Assay developed for the Cedex Bio and Cedex Bio HT Analyzer provides fast and accurate quantitative measurements in cell culture and fermentation media. The assay principle is based on the conversion of sucrose to glucose and fructose by β-Fructosidase. Glucose is phosphorylated by ATP in the presence of hexokinase (HK) to glucose-6-phosphate (G-6-P), which is oxidized by NADP⁺ in presence of glucose-6-phosphate dehydrogenase (G6PDH). The NADPH formation is measured photometrically at 340 nm and is directly proportional to the sucrose concentration.

\[
\text{Sucrose} + H_2O \xrightarrow{\beta-\text{Fructosidase}} \text{D-Glucose} + \text{D-Fructose}
\]

\[
\text{D-Glucose} + \text{ATP} \xrightarrow{\text{HK}} \text{G-6-P} + \text{ADP}
\]

\[
\text{G-6-P} + \text{NADP}^+ \xrightarrow{\text{G6PDH}} \text{Gluconate-6-P} + \text{NADPH} + \text{H}^+
\]

**Trust results to make high confidence decisions**
- Accurate results over a wide linear measuring range
- Extended range with automated on-board dilution

Rely on precise results

Precision was determined in samples of three concentration levels. Coefficients of variation (CV) were calculated for in-run precision (n=21) and inter-run precision (on 10 days). Representative performance data from Cedex Bio HT Analyzers are shown. Results obtained in individual laboratories may differ.

Save time with improved workflow efficiency
- Ready-to-use reagents
- Long on-board and calibration curve stability
- Barcoded reagents
- Pre- and post-dilution capability

Take control of your bioprocess with the Cedex portfolio
- Broad and expandable assay menu
- 2 instrument platforms with identical technology, menu and reagents to fit throughput and automation needs
- Solutions for development and manufacturing environments

Eliminate interference of glucose background
If glucose is present in the sample, an automatic sucrose correction can be performed to subtract the glucose concentration and obtain the sucrose concentration.
